seife@SeifEddine MINGW64 ~/myFirstTerraformProject/terraform-vpc-lab (main)
$ terraform init
you run "terraform init" in the future.

Terraform has been successfully initialized!

You may now begin working with Terraform. Try running "terraform plan" to see
any changes that are required for your infrastructure. All Terraform commands
should now work.

If you ever set or change modules or backend configuration for Terraform,
rerun this command to reinitialize your working directory. If you forget, other
commands will detect it and remind you to do so if necessary.

seife@SeifEddine MINGW64 ~/myFirstTerraformProject/terraform-vpc-lab (main)
$ terraform plan -var="key_pair_name=seif-terraform-key"
```

```
seife@SeifEddine MINGW64 ~/myFirstTerraformProject/terraform-vpc-lab (main)
$ terraform apply
var.key_pair_name
  Enter a value: seif-terraform-key

data.aws_ami.amazon_linux: Reading...
data.aws_ami.amazon_linux: Read complete after 1s [id=ami-0d05471b100e9083f]

Terraform used the selected providers to generate the following execution plan.
Resource actions are indicated with the following symbols:
  + create

Terraform will perform the following actions:

  # aws_instance.web_server will be created
  + resource "aws_instance" "web_server" {
```

```
seife@SeifEddine MINGW64 ~/myFirstTerraformProject/terraform-vpc-lab (main)
$ ssh -i ~/Downloads/seif-terraform-key.pem ec2-user@44.201.66.250
